

Fees, billing and insurance forms are known to be one of the areas in a dental office which can result in misunderstanding and frustration. Please remember that your insurance benefits depend on the type of plan that has been purchased for you. Rarely does a plan cover more than 50% of our fees and the amount they will pay is limited annually by the individual maximum outlined by your particular plan. We are happy to prioritize and sequence your treatment in such a way that you are able to maximize your annual insurance benefit.

If any of our policies are unclear or cause any concern on your part, please voice your concerns so that we can explain these problem areas and reach an understanding with you. You have come to this office because of concern for your dental health; we do not wish to add any additional burden to that concern.

Our policy involves definite financial arrangements before treatment is started. We offer a 5% fee reduction for payment made entirely in advance.

We thank you and we look forward to working with you on your journey to comprehensive oral health.
